Idle

Connect
In response to a ManualStart event (Event 1) or an AutomaticStart event (Event 3)

OpenSent
If the DelayOpenTimer_Expires event (Event 12) occurs in the Connect state
Or
If the DelayOpen attribute is set to FALSE

Active
If the TCP connection fails (Event 18), the local system checks the DelayOpenTimer. If the DelayOpenTimer is running...

OpenConfirm
If an OPEN message is received while the DelayOpenTimer is running (Event 20)

OpenConfirm
When an OPEN message is received, all fields are checked for correctness.
If there are no errors in the OPEN message (Event 19)

Established
If the local system receives a KEEPALIVE message (KeepAliveMsg (Event 26))

Connect
In response to a ConnectRetryTimer_Expires event (Event 9)

OpenConfirm
In response to a ManualStart_with_PassiveTcpEstablishment event (Event 4) or AutomaticStart_with_PassiveTcpEstablishment event (Event 5)

OpenConfirm
If an OPEN message is received and the DelayOpenTimer is running (Event 20)

OpenConfirm
If an OPEN message is received while the DelayOpenTimer is running (Event 20)

OpenConfirm
If the local system receives an OPEN message (Event 12)
Or
If the DelayOpen attribute is set to FALSE

In response to the success of a TCP connection (Event 16 or Event 17)
